

EPA-280WBE

EVAC BOOSTER AMPLIFIER

Features

- Protection from heat & overload faults
- LED indicators for status monitoring
- Selectable 2 or 4 channel modes
- Balanced output, no grounding noise
- Built-in limiter ensures clean sound
- Distortion-Free Sound

Description

EKA VIS EPA-280WBE is a high-performance booster amplifier designed to extend audio power in professional and emergency voice evacuation systems. It supports 70–100V constant voltage and 4–16Ω low impedance outputs, enabling flexible system expansion. With selectable 2 or 4 channel operation and a balanced design, it ensures stable, noise-free signal amplification.

EKA VIS EPA-280WBE features built-in protection against short circuit, overload, and overheating, along with an integrated limiter for clear, distortion-free output. LED indicators provide real-time status monitoring, while its pure amplification design ensures consistent performance.

Technical Specification

Rated Power Output	280W
Line Voltage	70-100V
Output Impedence	4-16Ω
Dimension	435mmx390mmx90mm
Approximate Weight	17.26 Kg
