

EPA-TB+EPA-TBM

TALK BACK CONTROLLER

Features

- Clear and high-quality audio output
- LCD display with audio alert
- Supports 6 to 150 zones
- Zone call indication on display
- Wall or rack mounting options
- Durable mild steel enclosure

Description

EKAIVS EPA-TB+EPA-TBM is a reliable two-way emergency communication system designed for efficient zone-based communication in public address and safety applications. It delivers clear, high-quality audio output and supports multiple zone configurations, scalable from 6 up to 150 zones. With an intuitive LCD display, users can easily monitor zone calls along with audio alerts for effective communication control.

EKAIVS EPA-TB+EPA-TBM features feather-touch switches for long operational life and a durable mild steel enclosure for robust performance. It offers flexible installation with wall or rack mounting options and supports consoles with or without a gooseneck microphone. User-friendly on-screen instructions and customizable features make it suitable for diverse operational requirements.
